Auditor's Report

PwC ZT Shen Zi (2017) No. 25240

To the Board of Directors of Novelis (China) Aluminum Products Co., Ltd.:

We have audited the accompanying financial statements of Novelis (China) Aluminum Products Co., Ltd. (the "Company") which comprise the balance sheet as at 31 December 2016, the income statement, the statement of changes in owner's equity and the cash flow statement for the year ended 31 December 2016, and the notes to the financial statements.

Management's Responsibility for the Financial Statements

Management of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with the requirements of Accounting Standards for Business Enterprises, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the China Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

1 General information

Novelis (China) Aluminum Products Co., Ltd. (the "Company") is a limited liability company incorporated in Changzhou, Jiangsu Province of the People's Republic of China on 18 June 2012 by Novelis Inc.. The Company has an approved operating period of 50 years. The registered capital was USD 40,000,000. Following the resolution of board of directors and amended articles on 15 June 2013 and the approval of Commerence Department of Jiangsu Province, the Company applied for increasing the registered capital by USD 16,700,000. And the paid-in capital is therefore raised to USD 56,700,000.

The Company's approved scope of business operations and the principal activities for the year ended 31 December 2016 includes research, develop and manufacture of special aluminum sheet for automobile use; sale of self-manufactured products; import and export, domestic wholesale and commissioned agency (excluding auction) of metal materials and products and provision of ancillary services (manufacturing projects can be only run by branches).

These financial statements were authorised for issue by the Company's legal representative on 27 May 2017.

2 Basis of preparation

The financial statements were prepared by the Company in accordance with the Basic Standard and 38 specific standards of the Accounting Standards for Business Enterprises issued by Ministry of Finance on 15 February 2006, Application Guidance of the Accounting Standard for Business Enterprises, Interpretation of the Accounting Standards for Business Enterprises and other regulations issued thereafter (the "Accounting Standard for Business Enterprises", "China Accounting Standards" or "CAS").

The net loss of the Company for year ended 31 December 2016 was RMB 60,397,888.47. As at 31 December 2016, the accumulated losses of the Company were RMB 148,201,171.63, and the current liabilities excessed the current assets by RMB 98,695,648.53. The continuation of the business of the Company largely depends on continuing financial support from the investor. The Company's parent company, Novelis Inc. has confirmed its intention to provide continuing financial support to the Company so as to enable the Company to meet its liabilities as and when they fall due and to carry on its business without a significant curtailment of operations for the foreseeable future. The board of directors believes that the operations of the Company will continue as a going concern and therefore these financial statements are prepared on the going concern basis.

3 Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the year ended 31 December 2016 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the financial position of the Company as of 31 December 2016 and of its financial performance, cash flows and other information for the year ended 31 December 2016.

4 Summary of significant accounting policies and accounting estimates

(1) Accounting period

The Company's accounting year starts on 1 January and ends on 31 December.

(2) Recording currency

The recording currency is Renminbi ("RMB").

(3) Foreign currency translation

Foreign currency transactions are translated into RMB using the exchange rates prevailing at the dates of the transactions.

At the balance sheet date, monetary items denominated in foreign currencies are translated into RMB using the spot exchange rates on the balance sheet date. Exchange differences arising from these translations are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for the acquisition or construction of qualifying assets, which are capitalised as part of the cost of those assets. Non-monetary items denominated in foreign currencies that are measured at historical costs are translated at the balance sheet date using the spot exchange rates at the date of the transactions. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

(4) Cash

Cash comprises cash on hand and deposits that can be readily drawn on demand.

(5) Financial assets

Financial assets are classified into the following categories at initial recognition: financial assets at fair value through profit or loss, receivables, available-for-sale financial assets and held-to-maturity investments. The classification of financial assets depends on the Company's intention and ability to hold the financial assets. The major financial assets held by the Company are financial assets at fair value through profit or loss and receivables.

(a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are forward contracts, which may be recognized as financial liabilities at fair value through profit or loss when losses arise from changes in fair value.

(b) Receivables

Receivables, including accounts receivable and other receivables, are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market (Note 4 (6)).

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(5) Financial assets (Cont'd)

(c) Recognition and measurement

Financial assets are recognised at fair value on the balance sheet when the Company becomes a party to the contractual provisions of the financial instrument. In the case of financial assets at fair value through profit or loss, the related transaction costs incurred at the time of acquisition are recognised in profit or loss for the current period. For other financial assets, transaction costs that are attributable to acquisition of the financial assets are included in their initially recognised amounts. A financial asset is derecognised when the contractual rights to receive the cash flows from the financial asset have expired, or all the substantial risks and rewards of ownership of the financial asset have been transferred.

Financial assets at fair value through profit or loss are subsequently measured at fair value. Investments in equity instruments are measured at cost when they do not have a quoted market price in an active market and whose fair value cannot be reliably measured. Receivables are subsequently measured at amortised cost using the effective interest method.

(d) Impairment of financial assets

The Company assesses the carrying amounts of financial assets at each balance sheet date. If there is objective evidence that a financial asset is impaired, an impairment loss is provided for.

When an impairment loss on a financial asset carried at amortized cost has occurred, the amount of loss is provided for at the difference between the asset's carrying amount and the present value of its estimated future cash flows (excluding future credit losses that have not been incurred). If there is objective evidence that the value of the financial asset recovered and the recovery is related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed and the amount of reversal is recognized in profit or loss.

Gains or losses arising from change in the fair value of financial assets at fair value through profit or loss are recognised in profit or loss for the current period as "gains of losses arising from changes in fair value". Interests and cash dividends received during the period in which such financial assets are held, as well as gains or losses arising from disposal of these assets are recognised in profit or loss for the current period.

(6) Receivables

Receivables comprise accounts receivable and other receivables. Accounts receivable arising from sale of goods or rendering of services are initially recognised at fair value of the contractual payments from the buyers or service recipients.

Receivables with amounts that are individually significant are subject to separate assessment for impairment. If there exists objective evidence that the Company will not be able to collect the amount under the original terms, a provision for bad debts of that receivable is made at the difference between its carrying amount and the present value of its estimated future cash flows.

Receivables with amounts that are not individually significant and those receivables that have been individually assessed for impairment and have not been found impaired are classified into certain groupings based on their credit risk characteristics. The provision for bad debts is determined based on the historical loss experience for the groupings of receivables with similar credit risk characteristics, taking into consideration of the current circumstances.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(7) Inventories

Inventories include raw materials, work in progress, finished goods and turnover materials, and are measured at the lower of cost and net realisable value.

Cost is determined using the weighted average method. The cost of finished goods and work in progress comprise raw materials, direct labour and systematically allocated production overhead based on the normal production capacity. Turnover materials include low value consumables and packaging materials. Low value consumables are amortised into expenses based upon numbers of usage, and the packaging materials are expensed when issued.

Provision for decline in the value of inventories is determined at the excess amount of the carrying amounts of the inventories over their net realizable value. Net realizable value is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes.

The Company adopts the perpetual inventory system.

(8) Fixed assets

Fixed assets comprise buildings, machinery and equipment, tools, motor vehicles and computer and electronic equipment. Fixed assets purchased or constructed by the Company are initially measured at cost at the time of acquisition.

Subsequent expenditures incurred for a fixed asset are included in the cost of the fixed asset when it is probable that the associated economic benefits will flow to the Company and the related cost can be reliably measured. The carrying amount of the replaced part is derecognized. All the other subsequent expenditures are recognized in profit or loss in the period in which they are incurred.

Fixed assets are depreciated using the straight-line method to allocate the cost of the assets to their estimated residual values over their estimated useful lives. For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated residual values expressed as a percentage of cost and the annual depreciation rates of fixed assets are as follows:

	Estimated useful lives	Estimated residual values	Annual depreciation rates
Buildings	20-40 years	5%	2%-5%
Machinery and equipment	10-25 years	5%	4%-10%
Tools	5 years	5%	19%
Motor vehicles	4-5 years	5%	19%-24%
Computer and electronic equipment	3-5 years	5%-10%	18%-32%

The estimated useful life, the estimated net residual value of a fixed asset and the depreciation method applied to the asset are reviewed, and adjusted as appropriate at each year-end.

A fixed asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposals on sale, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(9) Construction in progress

Construction in progress is measured at actual cost. Actual cost comprises construction costs, installation costs, borrowing costs that are eligible for capitalisation and other costs necessary to bring the fixed assets ready for their intended use. Construction in progress is transferred to fixed assets when the assets are ready for their intended use, and depreciation begins from the following month.

(10) Intangible assets

Intangible assets are land use rights and softwares measured at cost.

(a) Land use rights

Land use rights are amortised on the straight-line basis over their approved use period of 50 years. If the acquisition costs of the land use rights and the buildings located thereon cannot be reasonably allocated between the land use rights and the buildings, all of the acquisition costs are recognised as fixed assets.

(b) Softwares

Softwares are amortised on the straight-line basis over their estimated useful lives, generally 5 to 10 years.

(c) Periodical review of useful life and amortisation method

For an intangible asset with a finite useful life, review of its useful life and amortization method is performed at each year-end, with adjustment made as appropriate.

(11) Impairment of long-term assets

Fixed assets, construction in progress and intangible assets with finite useful lives are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date; intangible assets that are not yet avaialbe for their intended use are tested for impairment at least annually, irrespective of whether there is any indication of impairment.If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Once the above asset impairment loss is recognized, it will not be reversed for the value recovered in the subsequent periods.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(12) Borrowing costs

The borrowing costs that are directly attributable to the acquisition and construction of an asset that needs a substantially long period of time for its intended use commence to be capitalised and recorded as part of the cost of the asset when expenditures for the asset and borrowing costs have been incurred, and the activities relating to the acquisition and construction that are necessary to prepare the asset for its intended use have commenced. The capitalisation of borrowing costs ceases when the asset under acquisition or construction becomes ready for its intended use and the borrowing costs incurred thereafter are recognised in profit or loss for the current period. Capitalisation of borrowing costs is suspended during periods in which the acquisition or construction of a fixed asset is interrupted abnormally and the interruption lasts for more than 3 months, until the acquisition or construction is resumed.

(13) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred, and subsequently stated at amortised cost using the effective interest method. Borrowings of which the period is within one year (including one year) are classified as the short-term borrowings, and the others are classified as long-term borrowings.

(14) Employee benefits

Employee benefits include short-term employee benefits and post-employment benefits, provided in various forms of consideration in exchange for service rendered by employees or compensations for the termination of employment relationship.

(a) Short-term employee benefits

Short-term employee benefits include employee wages or salaries, bonus, allowances and subsidies, staff welfare, premiums or contributions on medical insurance, work injury insurance and maternity insurance, housing funds, union running costs and employee education costs, short-term paid absences. The employee benefit liabilities are recognized in the accounting period in which the service is rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets. Employee benefits which are non-monetary benefits are measured at fair value.

(b) Post-employment benefits

The Company classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Company pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Company's post-employment benefits mainly include basic pensions and unemployment insurance, both of which belong to the defined contribution plans.

Basic pensions

The Company's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on the basic pensions are calculated according to prescribed bases and percentage by the relevant local authorities. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognized as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(15) Deferred tax assets and deferred tax liabilities

Deferred tax assets and deferred tax liabilities are calculated and recognised based on the differences arising between the tax bases of assets and liabilities and their carrying amounts (temporary differences). Deferred tax asset is recognised for the deductible losses that can be carried forward to subsequent years for deduction of the taxable profit in accordance with the tax laws. No deferred tax liability is recognised for a temporary difference arising from the initial recognition of goodwill. No deferred tax asset or deferred tax liability is recognised for the temporary differences resulting from the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred tax assets are only recognised for deductible temporary differences, deductible losses and tax credits to the extent that it is probable that taxable profit will be available in the future against which the deductible temporary differences, deductible losses and tax credits can be utilised.

Deferred tax assets and liabilities are offset when:

- the deferred taxes are related to the same tax payer within the Company and the same taxation authority; and,
- that tax payer within the Company has a legally enforceable right to offset current tax assets against current tax liabilities.

(16) Revenue recognition

The amount of revenue is determined in accordance with the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Company's activities. Revenue is shown net of value-added tax, rebates, discounts and returns.

Revenue is recognised when it's probable that the economic benefits associated with the transaction will flow to the Company, the relevant revenue can be reliably measured and specific revenue recognition criteria have been met for each of the Company's activities as described below:

(a) Sale of goods

Revenue from the sale of goods is recognized when significant risks and rewards of ownership of the goods are transferred to the buyer, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and it is probable that the economic benefit associated with the transaction will flow to the Company and the relevant revenue and costs can be measured reliably.

(b) Rendering of processing services

The Company provides processing sevices to related parties. The related revenue is recognised according to the processing fees agreed upon the contract.

(c) Transfer of asset use rights

Interest income is recognised on a time-proportion basis using the effective interest method.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(17) Leases

A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. An operating lease is a lease other than a finance lease.

(a) Operating leases

Lease payments under an operating lease are recognized on a straight-line basis over the period of the lease, and are either capitalized as part of the cost of related assets, or charged as an expense for the current period.

Lease revenues under an operating lease are recognised on a straight-line basis.

(18) Determination of fair value of financial instruments

The fair value of a financial instrument that is traded in an active market is determined at the quoted price in the active market. The fair value of a financial instrument that is not traded in an active market is determined by using a valuation technique. Valuation techniques include using prices of recent market transactions between knowledgeable and willing parties, reference to the current fair value of another financial asset that is substantially the same with this instrument, and discounted cash flow analysis, etc. When a valuation technique is used to establish the fair value of a financial instrument, it makes the maximum use of market inputs and relies as little as possible on entity-specific inputs.

(19) Critical accounting estimates and judgments

The Company continually evaluates the critical accounting estimates and key judgments applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Critical accounting estimates and key assumptions

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next accounting year are outlined below:

(i) Provision for bad debts of receivables

The impairment for receivables is based on the assessment of the collectability of receivables. Management assesses the impairment for receivables by using judgment and estimates. The differences between actual results and the original estimates will impact the carrying amount of the receivables and provision or reversal of provision for bad debts of the receivables during the period of changes of estimates.

(ii) Net realisable value of inventories

Net realisable value of inventories is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes. These estimates are made based on current market conditions and historical experiences of selling products of similar nature, which may change due to the changes of customer's preference and the changes adopted by competitors in the different stage of business cycle. The management assesses the reasonableness of this estimate on each financial statements date.

4 Summary of significant accounting policies and accounting estimates (Cont'd)

(19) Critical accounting estimates and judgments (Cont'd)

(a) Critical accounting estimates and key assumptions (Cont'd)

(iii) Useful lives and residual values of fixed assets

The management of the Company determines the estimated useful lives and estimated residual values of fixed assets. This estimate is based on the historical experience of the actual useful lives and residul value of fixed assets of similar nature and functions. It could change significantly as a result of changes in the actual usage and renovation conditions, technical innovations, industry cycles and other conditions. Where the actual useful lives and residual values are different from the estimates, the management will adjust them accordingly.

(iv) Income taxes, deferred tax assets and deferred tax liabilities

There are many transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgment is required from the Company in determining the provision for income taxes in each of these jurisdictions. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled. Expected applicable tax rate is determined according to current tax regulation and status of the Company.

The Company management recognizes deferred tax assets according to expected taxable income gained with great possibility which will deduct temporary difference for coming years.If expected taxable income for coming year changes, the Company management will adjust deferred tax assets accordingly.

5 Taxation

The main categories and rates of taxes applicable to the Company are set out below:

Category	Tax rate	Taxable base
Enterprise income tax	25%	Taxable income
Value added tax ("VAT")(a)	17% and 6%	Taxable value added amount (Tax payable is calculated using the taxable sales amount multiplied by the applicable tax rate.)

(a) Pursuant to the Circular on the Pilot Plan for Levying VAT in Place of Business Tax (Caishui No.110, 2011) and the Circular on the Pilot Practice of Levying VAT in Place of Business Tax for the Transportation Industry and Some Modern Service Industries in China (Caishui No.37, 2013) jointly issued by the Ministry of Finance and the State Administration of Taxation, expenses paid on behalf of overseas related parties is subject to VAT since 1 August 2013, and the applicable tax rate is 6%.

The Company's sales of products are subject to VAT. The applicable tax rate for domestic sales is 17%, and the Company has been approved to use the "exempt, credit, refund" method on goods exported providing a tax refund at the rate of 13%.

8 Commitments

(1) Capital commitments

Capital expenditures contracted for by the Company but are not yet necessary to be recognised on the balance sheet as at the balance sheet date are as follows:

	31 December 2016	31 December 2015
Buildings, machinery and equipment	-	15,000,000.00

(2) Operating lease commitments

The future minimum lease payments due under the signed irrevocable operating leases contracts are summarized as follows:

	31 December 2016	31 December 2015
Within 1 year	361,661.25	274,072.00
1 to 2 years	43,759.47	43,956.00
	405,420.72	318,028.00

9 Financial risk

The Company's activities expose it to a variety of financial risks: market risk (primarily including currency risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

9 Financial risk (Cont'd)

(1) Market risk

(a) Foreign exchange risk

The Company's major operational activities are carried out in Mainland China. A part of the transactions are denominated in USD and EUR, and relevant construction expenditures are mailnly denominated in RMB, USD and EUR. The Company is exposed to foreign exchange risk arising from the recognised assets and liabilities, and future transactions denominated in foreign currencies, primarily with respect to USD and EUR. The Company's finance department is responsible for monitoring the amount of assets and liabilities, and transactions denominated in foreign currencies to minimise the foreign exchange risk. Therefore, the Company may consider entering into forward exchange contracts or currency swap contracts to mitigate the foreign exchange risk. As at 31 December 2016, the Company did not enter into any forward exchange contracts or currency swap contracts (31 December 2015: USD 20,000,000.00).

As at 31 December 2016 and 31 December 2015, the carrying amounts in RMB equivalent of the Company's assets and liabilities denominated in foreign currencies are summarized below:

	31 December 2016		
	USD	EUR	Total
Financial assets denominated in foreign currency -			
Cash at bank and on hand	2,966,700.31	-	2,966,700.31
Accounts receivable	29,206,662.62	-	29,206,662.62
	32,173,362.93	-	32,173,362.93
Financial liabilities denominated in foreign currency -			
Accounts payable	210,906,697.68	12,570,393.01	223,477,090.69
Short-term borrowings	257,423,501.97	-	257,423,501.97
Long-term borrowings	57,439,451.36	77,894,690.69	135,334,142.05
	525,769,651.01	90,465,083.70	616,234,734.71

	31 December 2015		
	USD	EUR	Total
Financial assets denominated in foreign currency -			
Cash at bank and on hand	48,159,644.31	-	48,159,644.31
Accounts receivable	112,988,443.91	-	112,988,443.91
	161,148,088.22	-	161,148,088.22
Financial liabilities denominated in foreign currency -			
Accounts payable	223,588,371.22	5,867,114.91	229,455,486.13
Other payables	1,687,837.92	424,117.99	2,111,955.91
Short-term borrowings	123,204,322.25	-	123,204,322.25
Long-term borrowings	50,502,452.50	70,666,718.14	121,169,170.64
	398,982,983.89	76,957,951.04	475,940,934.93

9 Financial risk (Cont'd)

(1) Market risk (Cont'd)

(a) Foreign exchange risk (Cont'd)

As at 31 December 2016, if RMB had strengthened/weakened by 10 % against the foreign currencies while all other variables had been held constant, the Company's net losses for the year would have been approximately RMB 43,804,602.88 lower/higher (2015: approximately RMB 23,609,463.50 lower/higher) for various financial assets and liabilities denominated in foreign currencies.

(b) Interest rate risk

The Company's interest rate risk arises from long-term interest bearing borrowings including long-term borrowings. Financial liabilities issued at floating rates expose the Company to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Company to fair value interest rate risk. The Company determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 31 December 2016, the Company's long-term interest bearing borrowings were mainly RMB/USD/EUR-denominated with fixed rates, amounting to RMB 442,754,787.89 (31 December 2015: RMB 410,969,724.82) (Note 6(14)).

The Company's finance department continuously monitors the interest rate position of the Company. Increases in interest rates will increase the cost of new borrowing and the interest expenses with respect to the Company's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Company's financial performance. The Company makes adjustments timely with reference to the latest market conditions and may enter into interest rate swap agreements to mitigate its exposure to interest rate risk. During 2016 and 2015, the Company did not enter into any interest rate swap agreements.

(2) Credit risk

Credit risk is managed on a group basis. Credit risk mainly arises from cash at bank, accounts receivable and other receivables.

The Company expects that there is no significant credit risk associated with cash at bank since they are deposited at state-controlled banks and other medium or large size listed banks. Management does not expect that there will be any significant losses from non-performance by these counterparties.

In addition, the Company has policies to limit the credit exposure on accounts receivable and other receivables. The Company assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. The credit history of the customers is regularly monitored by the Company. In respect of customers with a poor credit history, the Company will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Company is limited to a controllable extent.

(3) Liquidity risk

Cash flow forecasting is performed by finance department of the Company, and monitors rolling forecasts of the Company's short-term and long-term liquidity requirements to ensure it has sufficient cash to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Company does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements.

The financial liabilities of the Company at the balance sheet date are analysed by their maturity date below at their undiscounted contractual cash flows:

9 Financial instrument and risk (Cont'd)

(3) Liquidity risk (Cont'd)

	31 December 2016		
	Within one year	Over five years	Total

	572,230,984.19	586,372,143.77	1,158,603,127.96

10 Fair value estimates

The level in which fair value measurement is categorised is determined by the level of the fair value hierarchy of the lowest level input that is significant to the entire fair value measurement:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

(1) Assets measured at fair value on a recurring basis

As at 31 December 2016 and 2015, no assets measured at fair value on a recurring basis are held by the Company.

(2) Assets measured at fair value on a non-recurring basis

Non-current assets held for sale are recognised at the amount equal to the lower of the original carrying amount and the fair value less costs to sell. As at 31 December 2016 and 2015, no assets measured at fair value on a non-recurring basis are held by the Company.

(3) Assets and liabilities not measured at fair value but for which the fair value is disclosed

Financial assets and liabilities measured at amortised cost mainly include receivables, short-term borrowings, payables, long-term borrowings and long-term payables.

As at 31 December 2016 and 31 December 2015, the carrying amount of the financial assets and liabilities not measured at fair value is a reasonable approximation of their fair value.

11 Capital management

The Company’s capital management policies aim to safeguard the Company’s ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Company may increase capital or sell assets to reduce debts.

The Company's total capital is calculated as “owner’s equity” as shown in the balance sheet. The Company is not subject to external mandatory capital requirements.

As at 31 December 2016 and 31 December 2015, the Company’s gearing ratio is as bellow:

	31 December 2016	31 December 2015
Gearing ratio	85%	79%
